

I pay for XM Radio because I want the information that they provide Commercial free. It is a lot easier to find this information on XM than it is on a local radio especially if you are traveling and do not know what radio station to look for. Besides how would you know if you found the right station any way, there would probably be a commercial playing at the time you are scanning though the radio dial. When I want INSTANT TRAFFIC AND WEATHER I want INSTANT TRAFFIC AND WEATHER. If you don't know Instant means just that, not waiting five minutes listening to commercials before find out that there is traffic in front of you. Since you, the FCC, are supposed to be helping me, an American citizen I expect you to reject the NAB's petition 04-160 and support XM Radio's ability to provide the kind of programming that I demand and deserve.

James Maxwell
